Education

Academy of Cryptography Techniques (KMA) Software Engineering

09/2023 – Present | Ha Noi, Viet Nam

- GPA: 3.5 / 4.0
- Academic Excellence Scholarship: Awarded for ranking in the top 5% of students in the Software Engineering department.
- Led a 4-person team in Systems Analysis & Design coursework; delivered final project with grade A

Projects

EasyEnglish Academic Management System

Technologies: Node.js, Express.js, React.js, MongoDB, Docker

Backend Developer | Team of 3

GitHub: <https://github.com/minhquan2955/EasyEnglish> 🔗

- **Designed and built a REST API** with JWT authentication, role-based access control (4 roles), and Zod schema validation serving 40+ endpoints across 14 resource controllers.
- **Developed business logic services** for automated schedule generation, bulk attendance check-in, batch exam scoring with a background task that auto-completes expired sessions every 5 minutes.
- **Containerized the application with Docker Compose** (Node.js + MongoDB + React.js), featuring health checks, non-root security, and multi-stage builds for production-ready deployment.

Smart Parking Management System

Technologies: Java 21, Spring Boot, PostgreSQL, JPA, Flyway, Docker

Backend Developer | Team of 3

Github: <https://github.com/minhquan2955/Parking-web-system-with-firmware> 🔗

- **Built REST APIs** for user and card management, role-based access, card renewals, parking sessions, and administrative audit logs.
- **Implemented ESP32 device APIs** for heartbeats and entry/exit scans, validating card status, expiry, and parking capacity while preventing duplicate event processing.
- **Integrated PayOS payment workflows** with signed webhook verification, idempotent payment processing, and order reconciliation; applied successful renewals and receipts transactionally.

Certificates

TOEIC Listening & Reading

Score: 900/990

Claude Code 101 – Anthropic

Applied AI coding agents in real development workflows: automated refactoring, cross-codebase navigation, and AI-assisted debugging

Technical Skills

Languages: Java, JavaScript, TypeScript, SQL

Backend: Spring Boot, Node.js, Express.js, Prisma

Database: PostgreSQL, MongoDB
