Summary

Software Engineering student with strong problem-solving skills and hands-on experience building reliable backend systems. Strong academic performer with a 3.5/4.0 GPA and TOEIC score of 900. Seeking a backend internship to contribute to production systems while developing toward a well-rounded full-stack engineer specializing in software architecture, system design, and DevOps.

Education

Academy of Cryptography Techniques (KMA)

09/2023 – Present | Ha Noi, Viet Nam

Software Engineering

- GPA: 3.5 / 4.0
- Academic Excellence Scholarship: Awarded for ranking in the top 5% of students in the Software Engineering department.
- Led a 4-person team in Systems Analysis & Design coursework; delivered final project with grade A

Projects

EasyEnglish Academic Management System

05/2026 – 07/2026

Technologies: Node.js, Express.js, React.js, MongoDB, Docker

Backend Developer | Team of 3

GitHub: <https://github.com/minhquan2955/EasyEnglish> 🌐

- **Designed and built a REST API** with JWT authentication, role-based access control (4 roles), and Zod schema validation serving 40+ endpoints across 14 resource controllers.
- **Developed business logic services** for automated schedule generation, bulk attendance check-in, batch exam scoring with a background task that auto-completes expired sessions every 5 minutes.
- **Containerized the application with Docker Compose** (Node.js + MongoDB + React.js), featuring health checks, non-root security, and multi-stage builds for production-ready deployment.

Technical Skills

Backend

Node.js, Express.js, Prisma, RESTful API design

Databases

PostgreSQL, Prisma (ORM), Redis, MongoDB

Languages

Javascript (ES6+), Typescript, SQL

Tools & DevOps

Git, GitHub, Docker, Postman

Frontend

HTML, CSS, React.js

Certificates

TOEIC Listening & Reading

Score: 900/990
